Canada

CLUBLINK

A HIDDEN GEM

Extensive renovations and a stunning "train station" style club house put the crowning touches on the 36-hole Station Creek Golf Club. The transformation of the two courses, at a cost of \$12 million, is mirrored by the presence of the clubhouse with its expansive porch overlooking the South Course's finishing hole.

July 11, 2009 at Station Creek Golf Club

The Canadian Society for Life Science Research (CSLSR) is a registered non-profit organization that brings together student researchers to promote life sciences research in Canada. The purpose of the CSLSR is to aid in the educational and professional development of young life science researchers by providing them with a cohesive structure through which they may interact and communicate to further their knowledge.

The CSLSR is unique from any other scientific organization in Canada

A STUDENT-RUN INITIATIVE

The CSLSR is a student-run initiative that is composed entirely of volunteers—all of whom are students at Canadian universities. It is composed of researchers that will be at the forefront of innovations and discoveries that will improve the health care system and enhance knowledge translation. We are the link between researchers and the community.

ALL LIFE SCIENCE DISCIPLINES

The organization aspires to promote research in all life science disciplines in order to help translate the importance of current scientific findings to the general population in areas such as HIV, Breast Cancer, Spinal Cord Injury, Autism, Bone Disease, Alzheimer's Disease etc., and to contribute to the advancement of education in the life sciences in Canada.

HELP THE CSLSR:

- RECRUIT THE EXPERTISE OF LEADING SCIENTIFIC RESEARCHERS
- FUND STUDENT RESEARCH PROJECTS AND CONFERENCE TRAVEL
- ENCOURAGE THE ADVANCEMENT OF LIFE SCIENCE EDUCATION

On July 11, please come support the CSLSR and enjoy a day filled with fun activities
